## TRAGEDY IN A WELL IN UTAH

Salem, Utah, April 29.—Wesley Davis, 35 years old, of Salem, met a tragic end near here yesterday. He was either drowned or killed by a blow on the head while fast in a sixteen-inch pipe, down which he was descending into a well. His body remained in the pipe for more than two hours before his two brothers and a neighbor succeeded in getting a rope under the arms and dragging it upward.

Davis with his brother Alma were digging a well on the ranch of David Evans. They had descended thirty-five feet. In the well was about ten feet of water. At about 11 o'clock Wesley Davis deemed it necessary that he be let down to repair a coupling. He did not tie the rope about his shoulders, but merely caught hold and was lowered. Suddenly the brother felt the rope's tension relax; Wesley had let go. Frantic calls got no answer. Alma

Davis worked desperately with a hooked pipe to get hold of his brother's clothes, but without success. Then he went for help, getting William Williams of Spanish Fork. They worked until after 1 o'clock before they got the body to the surface.

In some manner Wesley Davis sustained a severe brain concussion. Physicians were unable to determine whether that caused his death or whether he was drowned.

## UTAH BOY IS DROWNED

Grant Shields of Tooele Thrown From a Barge on Bear Lake—Could Not Swim and Sank Before Help Arrived

Montpelier, Ida., April 29.—Grant Shields, 17-year-old son of Mr. and Mrs. Robert Shields of Tooele, Utah, was drowned in Bear lake yesterday when he and four others were thrown into the water from a barge.

Shields came to Paris Wednesday from Tooele to visit friends. Monday he was employed by the Utah Power & Light company, and yesterday morning embarked with four other young men on a barge, which, towed by a motorboat, was to carry them to the company's plant. The motorboat speeded up and pulled the nose of the barge on which were the young men, under the water, throwing all into the water.

Young Shields was the only one who could not swim. The others held to the barge until help came. Young Shields did not come to the surface. His body was found at about 9:30 o'clock, two hours after the drowning. It will be sent to Tooele today, in charge of W. R. Holmes and F. Boyen, who Shields was visiting in Paris. The funeral will probably be held in Tooele Thursday.

Young Shields was born in Tooele and was one of the most popular boys in that town.

## CHIEF JUSTICE'S GLASSES 'FALSE'

Washington, April 29.—Despite announcement by Justice White that the supreme court would be in session May 11, the court will not meet that day. May 11 is Sunday. The chief justice's glasses played him false when he read a memorandum. He meant to say that the court would be in session on Monday, May 12, and on that day would take a recess. It has been ordered accordingly.

AN APRIL NIGHT.  
April and night,  
The low moonlight  
Confers with flowers and trees;  
Grave silences  
Wherein the way  
Is planned toward May.

## WARNING TO LEGISLATORS

Secretary Bryan Tells Californians That the Administration Will Oppose Law Which Would Discriminate Against the Japs—Telegraphs the President

Sacramento, Cal., April 29.—A day of conference between Secretary of State Bryan and Governor Johnson and the members of the California legislature over proposed anti-alien land laws ended last night with the conference adjourned to await replies to messages sent to Washington by Mr. Bryan. The impression prevailed here, when the conference adjourned, that the resolve of the majority leaders, previously announced, to enact a bill specifically debarbing "aliens ineligible to citizenship" from owning land in California remained unchanged, although Mr. Bryan as the personal representative of President Wilson advised strongly against such action.

Governor Johnson indicated this in a brief, intense address to the conference. He declared California's right to follow the lead of other states in framing the land bill was unquestioned, and said such action now seemed assured.

"I have presented the president's views as I understand them," declared Mr. Bryan to the conference just before it adjourned. "I shall submit to him the further questions you have asked me, calling attention to the status of Washington and Arizona, and I shall be prepared Tuesday, I hope, to give you my answer."

Stating his position to the conference, Governor Johnson said in part: "The bill proposed for passage by the California legislature can call for no criticism from the national administration, nor from any foreign nation. Here in California it is not a question of whether the Japanese government takes offense at what we do, but whether we give that government just cause for offense. I do not believe the proposed law prohibiting land ownership by aliens was ever intended to citizenship gives the Japanese just cause for taking offense."

"If their dignity is threatened they should have protested when Washington and Arizona passed laws similar to that which we now propose to pass."

The conference lasted from 11 o'clock in the morning until far into the evening. It adjourned subject to the call of the presiding officers of the two houses of the legislature.

## SITUATION IN BALKANS

Action of Essad Pasha in Albania and Events in Saloniki Throws Cloak of Mystery Around the Entire War Zone

London, April 29.—The mystery surrounding events in the Balkans is becoming deepened. No further news has been received of Essad Pasha's exploit in Albania, and the situation at Saloniki is difficult to understand. A dispatch from Saloniki of current date confirms the report that orders were given for the Bulgarians to evacuate all places occupied by the Greeks, but that later these orders were countermanded and that official attempts were made to pretend they were never given.

A Bulgarian dispatch dated April 29, to the Daily Telegraph, expresses the firm conviction that immediate peace is signed between the allies and Turkey, and that a new war will commence between Serbia, Bulgaria and Greece.

A Bulgarian correspondent says that a large concentration of opposing troops are in readiness for these new campaigns, and adds that he has heard from reliable sources that considerable fighting has already occurred and that three important engagements were fought in the last week, concerning which the greatest secrecy has been maintained. He describes fighting, with heavy losses on both sides, between the Bulgarians and Servians to the northeast of Monastir, on April 10, and fighting between the Greeks and Bulgarians for a week in the vicinity of Nigrita, Seres and Saloniki.

The Daily Telegraph calls attention to the fact that whereas a few weeks ago the Servians were endeavoring to defeat and capture Djavid Pasha's army these operations appear to have ceased, and suggests that the cessation of the Servian attack is connected with Essad Pasha's coup.

Apparently the ambassadors' conference in London yesterday postponed its decision until the next meeting, which is set for May 1. "There is no cause for pessimism even now." This was the only official utterance that could be obtained regarding the result of the momentous conference of the ambassadors of the powers on the Balkan situation today.

The conference lasted more than three hours, and another, arranged for May 1, indicates that the diplomats still expect to find a peaceful solution of the problem caused by Montenegro's defiance of the powers.

## OTTAWA ROCKED BY EARTHQUAKE

Ottawa, Ont., April 29.—A well-defined earthquake of 15 seconds' duration was felt here last night. So far as is known no damage resulted. The tremors were felt in all sections of the city. A report gained currency that the big telescope at the observatory had collapsed with the dome of

Phones 2215 and 2216.

the building, and officials rushed to the experimental farm, where the observatory is located. Observers tested the machinery and found it worked perfectly.

"The tremors were exceedingly well defined and distinct," stated Dr. King, Dominion astronomer, "and I am sure we will have a splendid record when the seismograph film is developed in the morning."

The shock was particularly violent in the northwestern part of the city and Westmount, where houses swayed and furniture rattled for several seconds.

## MYSTERIOUS EXPLOSION

Cripple Creek, Colo., April 29.—Mrs. Ida Bacon, wife of James Bacon, representative from Teller county in the eighteenth general assembly, and her 6-year-old daughter Josephine, were instantly killed and the life of Bacon now hangs in the balance as the result of a mysterious explosion which wrecked the Bacon home yesterday morning. The force of the explosion was terrific and in all probability resulted from dynamite or nitroglycerin. The cause of the disaster remains a mystery.

It was while a fire was being started in the kitchen stove preparatory to the getting of breakfast that the explosion occurred. Mrs. Bacon and her little daughter were arranging the breakfast table, while the head of the family was building the fire.

Residents of the neighborhood rushed to the scene to find Bacon crawling on his hands and knees through the wreckage, while the mother and daughter lay dead in the northeast corner of the kitchen. Deep cuts were on the dead woman's head and her arm was broken, while the body of the child was horribly mutilated. The explosion, which without question occurred in the stove, was characteristic of nitroglycerin as its effects were freakish. The top of the stove was blown through the ceiling and flooring over the kitchen and into the ceiling of the room above. A sewing machine in the room was undisturbed and the glass in a framed picture, hanging within one foot of the shattered stove pipe was not even cracked.

Mrs. Bacon was 26 years old, and the daughter of Rev. A. B. Mertins of New York. She was divorced several years ago from W. J. Davidson, a letter carrier, who was transferred from Brooklyn, N. Y., to this city and who is now in Salt Lake. The little girl was the daughter of Davidson.

Salt Lake, April 29.—W. James Davidson is the manager of the Post-office cafeteria in Salt Lake. He received a telegram yesterday afternoon telling him of the death of his little girl, but giving no particulars. The news proved a great shock to him and he is anxiously awaiting news concerning the cause of the tragedy.

## MURDER IS MYSTERY

Atlanta, Ga., April 29.—Although four men are held by the police in connection with the murder of 14-year-old Mary Phagan, whose body was found in the basement of the "Fountain" company's factory here early Sunday morning, the identity of the person or persons who killed her remains unknown today.

No witnesses were heard at the coroner's inquest this morning, the taking of testimony being deferred by order of Coroner Donehue until Wednesday. Members of the jury were taken to the place where the girl's body was discovered and an examination of the premises made. The jury then adjourned.

Two of the arrests were made yesterday, chief in interest being that of John M. Gant, until recently book-keeper for the pencil company. Acting upon information that Gant had been seen with the girl and that he had visited the factory Saturday evening, the police instituted a search for him, which ended in the discovery that he had left Atlanta for Marietta, Ga. Authorities at the latter place were notified and the young man arrested as he was leaving a train. He was brought to Atlanta and a charge of "suspicion" entered against him. Later this charge was altered to "murder."

The other arrest yesterday was that of Gordon Bailey, negro elevator boy in the factory, suspected by the police of being the "tall, black negro," described in one of the incoherent notes found near the body. Leo M. Frank, president of the national penal commission, was taken in custody as a witness and subjected to a severe cross-examination, but he was discharged.

Arthur Mullinaus, as a suspect, apparently has established an alibi, but has not been released.

Newt Lee, negro night watchman, also held, was subjected to a grueling examination by the police, but he clings to his original story that he found the girl's body while making his rounds, and knows nothing of how she came to be in the building. While the police admit that they are possessed of important facts in connection with the crime it is probable that there will be no material developments until after the evidence is heard at Wednesday's inquest.

## GEN. OJEDA A PRISONER

U. S. Troops Arrest Mexican Commander at San Diego While En Route to Ensenada—Twenty Staff Officers Make Their Escape

San Diego, April 29.—General Pedro Ojeda, who commanded the Mexican federal troops at Naco, Sonora, until driven across the line into the United States, was taken into custody last night by United States soldiers when he arrived en route to Guaymas. Twenty of his staff officers also were taken to Fort Rosecrans, but escaped while the party was being transferred to the tug to be taken to the fort. Ojeda and his officers were to have sailed last night for Ensenada on their way to Guaymas. They were met at the station by a detachment of troops from the fort, however, and will be held pending further orders from Washington.

Major Davis, commandant at the fort, would only say that his orders were to hold the officers.

Ojeda declared he could not understand his arrest.

to California to make a personal investigation of the situation. The official view is more hopeful, owing to Secretary Bryan's mission, but public opinion still insists that the present is the most suitable moment to settle the whole American-Japanese question, and thus prevent a recurrence of similar disputes.

An inspired article in the newspaper Asahi explains that the delay in putting in force the Japanese foreign land ownership bill of 1910, has been due to the discovery of imperfections and the long list of these cited indicates that probably years will elapse before the amendments are approved.

## WEATHER FORECAST

Salt Lake City: Unsettled Tuesday and Wednesday.

Comparative weather data at Salt Lake City April 28, 1913:

Temperature (degrees):  
Highest today 74

## The Real Secret of Rejuvenating the Face

(From The Clubwoman.)  
She holds the true secret of facial rejuvenation who has learned how to remove the dead skin particles as fast as they appear. It's a secret anyone may possess. The aged, faded or discolored surface skin may be gradually absorbed, in an entirely safe and rational manner, by the nightly application of ordinary mercurized wax. Within a week or two the underlying skin, youthful and beautiful to behold, has taken the place of the discarded cuticle. So little of the old skin is absorbed each day there's no inconvenience at all, and no one suspects you are putting anything on your face. The mercurized wax, procurable at any drug store (an ounce is sufficient), is applied like cold cream. In the morning it is erased with soap and water. It's the best thing known for freckles, blackheads, pimples, moth patches, liver spots and fine surface wrinkles.

For the deeper wrinkles an excellent recipe is: Powdered snailshell, 1 oz., dissolved in ½ pt. witch hazel. Rubbing the face in the solution produces quick and wonderful results.

Whoever said that there is a remedy for every ill never was a dancer and lost a leg.
